POONTAMIZHAN K

Software Engineer | Java & Angular Full-Stack | Microservices | Generative AI Developer

+91 90808 73605 | srisaitamil2020@gmail.com | GitHub | LinkedIn | Chennai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven Software Engineer with **4+ years of experience** designing, building and delivering large-scale enterprise distributor-billing, promo & claim-settlement and web applications for **global FMCG (Fast Moving Consumer Goods) and consumer-brand clients**. Strong hands-on expertise in **Angular, Spring Boot, Spring Framework, Java, RESTful Microservices, Hibernate and MySQL** — plus active hands-on experience as a **Generative AI developer** building chatbots, RAG pipelines and sales-analytics models using **Small Language Models (SLMs), vector databases and private LLM deployments**. Currently a core contributor at Botree Software, owning multiple business-critical modules — **Offer Rollout (Nivea Promo & Claim Settlement)**, **Scheme & Contract Pricing (Wipro DMS)**, a self-built **CSNG ↔ SAP integration microservice**, **DAO & Stock-Management on HMD DMS** and an **in-house AI assistant / sales-analytics project**. Recognised by leadership for exceptional business-domain adaptability and smooth migration execution.

CORE TECHNICAL SKILLS

Languages	**Java 8 / 21** · JavaScript (ES6+) · TypeScript · Python · SQL · HTML5 · CSS3
Backend	**Spring Boot** · **Microservices** · Spring MVC · Spring Security · Spring Batch · Hibernate · JPA · REST APIs · JWT · Eureka · JSP / Servlets
Frontend	**Angular (12+)** · React.js · Redux · PrimeFaces · JSF · Bootstrap · Tailwind CSS · jQuery · AJAX · Chart.js · Responsive Design
Databases	MySQL · MongoDB · NoSQL · Native SQL · HQL · Stored Procedures · Query Optimization
Generative AI / LLM	**Generative AI** · **RAG** · **Agentic AI** · SLM · Private LLM · Chatbot Development · Sales-analytics AI · Prompt Engineering · Fine-tuning
Vector / AI Infra	Pinecone · ChromaDB · FAISS · Weaviate · Embeddings · Semantic Search · LangChain · MCP
AI Tooling	**Claude Code** · Claude API · Skilljar · AI-assisted Debugging · AI Code Review
Integration	**SAP Integration** · REST APIs · Microservice Design · AmazonS3 · SFTP · Excel ETL · JavaMail
DevOps / Tools	Git · GitLab · Maven · Jenkins · Docker · Postman · JIRA · IntelliJ IDEA · Eclipse · VS Code · Apache Tomcat
Testing	JUnit 5 · Mockito · Unit Testing · Integration Testing · TDD
Domain / Agile	FMCG Promo & Claim Settlement · Distributor Billing · DMS · Trade Promotion · Scheme Management · Contract Pricing · Agile / Scrum · SDLC

PROFESSIONAL EXPERIENCE

Botree Software International Pvt Ltd

Software Engineer 1 — Jan 2026 - Present | Chennai, India

Contributing to **multiple enterprise applications** — Promo & Claim Settlement, Distributor Billing (DMS), SAP integration and in-house GenAI tooling — delivered to global **FMCG and consumer-brand clients**.

Nivea — Promo & Claim Settlement Application (FMCG)

- **Owner of the Offer Rollout Module** — the main core module of the application, covering monthly base offers, growth / base budget validation, event calendars, daily and monthly allocations, claim settlement and all related sub-flows.
- Delivered end-to-end offer rollout for **all major e-commerce platforms under Nivea** (FLIPKART, Amazon, Quick-commerce and other online retailer accounts), driving monthly promotional cycles across multiple product categories and sub-accounts.
- Implemented strict configuration-driven validations, dialog-based budget capture and submit-time warning / re-prompt flows for business-critical approval gates.
- Delivered multiple high-impact Change Requests across Offer Rollout, Reports and Master-Data screens with strict quality and release discipline.

Wipro DMS Application (CSNG) — Full Distributor Billing Platform

- Core contributor on the **primary distributor-billing application** used by Wipro's distributor network for sales, billing, inventory and settlement.
- **Owner of the Scheme Module** — designed and delivered a **customized Scheme engine** supporting multiple scheme types (quantity, value, slab, free-goods, combination) and applied correctly at the **billing / invoice** level.

- **Owner of the Contract Pricing Module** — built contract-based pricing configuration, validation and application across the sales and billing workflow.
- Developed reports, dashboards and master-data screens; delivered multiple CRs with high defect-free delivery.

CSNG ↔ SAP Integration Microservice (Project: Drools)

- **Designed and built an independent Spring Boot + REST microservice** that handles **bi-directional data integration between CSNG and SAP** for the main business entities.
- **CSNG → SAP (outbound):** Billing details, Sales Orders, GRN, Stock, Retailer / Customer master, Sales Returns.
- **SAP → CSNG (inbound):** Purchase Imports and related master data.
- Implemented **change-tracking and re-sync logic** — any update made in CSNG is re-published to SAP, keeping both systems consistent.
- Owned API contract design, authentication, error-handling, retry and logging for the integration layer.

HMD DMS Application — Distributor Billing & Operations

- Contributing to the DMS billing and operations application delivered to **HMD** for their distributor network.
- Driving the **DAO-layer replacement / modernization** to improve performance, maintainability and testability of the data-access layer.
- Working on the **Stock Management Module** — stock inflow / outflow, inventory snapshots and reconciliation flows that feed billing and reporting.

In-house AI / GenAI Project — Sales Analytics & Distributor Chatbot

- **Designed and built an internal Generative-AI project** combining a private **Small Language Model (SLM)** with company data to deliver:
  - A **Distributor Q&A Chatbot** inside the DMS — distributors ask natural-language questions and get instant answers on orders, stock, schemes, settlements and reports.
  - A **Sales Analytics Assistant** that reads sales data, generates insights and summaries, and surfaces anomalies for business users.
- Implemented a **RAG (Retrieval-Augmented Generation) pipeline** over company data using **vector databases, embeddings and semantic search**.
- Deployed the model **privately / on-prem** to keep sensitive distributor and sales data secure.
- Applied **modern GenAI patterns** — Agentic workflows, Model Context Protocol (MCP) style tool-use, prompt engineering and evaluation.

> **Recognition — Botree Ignite (Manager Appreciation):** *"Demonstrated exceptional adaptability and played a significant role in the successful development and migration of key CSNG projects (HMD & Wipro) — delivered with high quality and within committed timelines."*

Clap Hands

Software Engineer Oct 2022 - Dec 2025 | Chennai, India

Enterprise CRM & Web Application Platform (B2B SaaS)

- Designed and developed enterprise CRM and web applications using **Spring Boot and React.js**, serving multiple B2B clients.
- Designed and optimized **RESTful microservices** (Eureka Server, JWT) for reliable, low-latency communication.
- Implemented **Spring Security + JWT** for secure, role-based authentication across tenants.
- Integrated and tuned **MySQL** databases with optimized indexes and batch operations, measurably improving throughput.
- Automated CI/CD pipelines with **Jenkins + Docker + GitLab**, reducing manual release effort.
- Delivered feature releases end-to-end in an **Agile Scrum** environment.

EDUCATION

B.E. - Electronics and Communication Engineering

Park College of Engineering and Technology (Anna University) Mar 2018 - Apr 2022 | Coimbatore, Tamil Nadu, India

CERTIFICATIONS & TRAINING

• **Claude Code - Developer Essentials** (Anthropic Learning via Skilljar) - AI pair-programming, agent workflows and effective prompting for software engineering.
• **Claude for Developers - Advanced API & Prompt Engineering** (Anthropic Learning via Skilljar) - Claude API, tool-use, prompt caching and production integration patterns.
• **Botree Ignite Programme - Manager Appreciation** - recognised for exceptional adaptability and successful delivery of CSNG, HMD and Wipro migration initiatives.
• **Java Full Stack Development** - Hands-on training in HTML, CSS, JavaScript, Java, Spring Boot and MySQL.
• **Angular Front-End Development** - Component architecture, RxJS, routing and state management.
